Kannapich Baosri

Software Developer | Computer Science Student

raccoonKannapit@gmail.com
github.com/raccoonKannapit

PROFILE

Computer Science and Software Development student at Sripatum University (GPA 3.77) with hands-on experience building web applications and managing databases. Comfortable working across front end and back end with JavaScript, React, Python and C#, and with both relational (MySQL) and NoSQL (MongoDB) databases. Eager to contribute to a development team and keep growing as a software developer.

Tools	Git & GitHub, Docker, n8n (workflow automation)

PROJECTS

Badminton Court Booking Web App Solo project

Web application for reserving badminton courts online · C#, .NET · github.com/raccoonKannapit/badminton_booking

- Designed and built the full application on my own, from database to user interface.
- Lets users check court availability and book time slots, replacing manual booking.
- Designed the database to manage courts, time slots and customer bookings.
